

# THE COMMITMENT OF FRENCH-SPEAKING SUPREME AUDIT INSTITUTIONS TO THE SUSTAINABLE DEVELOPMENT GOALS

Meeting in Romania in July 2023, Aisccuf affirmed seven principles defining and guiding the role of SAIs in achieving the SDGs

## 1 A systemic framework

SDGs constitute a common international framework for public policies that SAIs are responsible for auditing.

## 2 A framework to be incorporated into tools

SAIs must incorporate SDGs as an analytical grid in their audits and evaluations of public policies.

## 3 Public debate and accountability

SDGs are a tool for promoting the work of SAIs and contributing to public debate and information.

# 1 Strengthening transparency and control of public spending in line with the 2030 Agenda

# 2 A common language to control sustainable development issues

# 3 A role to be strengthened in the development of voluntary national reviews

# 4 The operationalization of SDGs is essential to the quality of audit work

# 5 Making societies more resilient to crises by integrating SDGs into SAIs audits

# 6 The key role of SAIs in achieving SDG 16

# 7 Publish and publicize the work of SAIs to strengthen their impact on citizens
